

Product Introduction

1. Electromechanical Universal Testing Machines (Digital Display & Computer Control)

Load Capacity from 100N to 600KN with Ball Screw and Servo Motor: Single/Double column Table type & floor type.

LDW Series - Digital Display Electromechanical UTM; Single & Double Column table type.

WDW Series - Economical Electromechanical UTM; Single & Double Column table type.

WDW-E Series - Computer Control Electromechanical UTM; Single & Double Column table type

WDW-D Series - Computer Control Electromechanical UTM; Double Column floor type

2. Hydraulic universal testing machines (Load Capacity from 100kN - 3000kN with Load Cell or Pressure Transducer)

WEW-C Series Computer Display

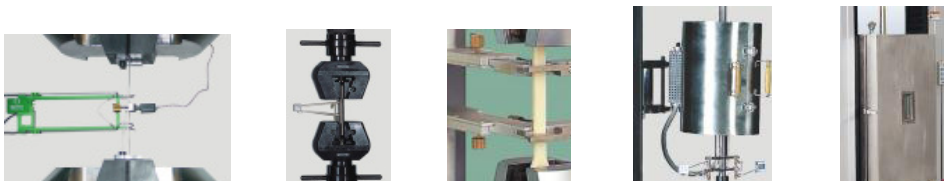

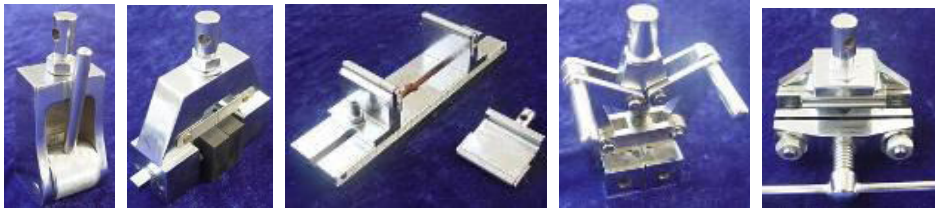

WAW-C Series Computer Control

WAW-E Series - Computer Controlled Hydraulic Universal Testing Machine With 4-column and 2-screw structure With Load cell measuring load.

3. Test Machine Accessories Accessories enabling the performance of a range of tests to suit most requirements

4. Fatigue Testing Machines

High tech fatigue static and dynamic testing machine for materials and components

Resonant Fatigue Testing Machine

5. Horizontal Testing Machines

Please contact us for a quotation to suit your specific testing requirements
